

# The Fibre of a Smart Nation

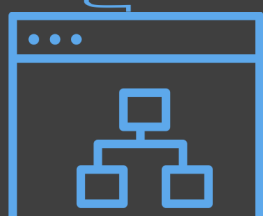

## Our Achievements

Laid over 76000km of fibre cables which can go around the earth almost 2 times

Over 1.2 million homes are fibre ready

Over 1.09 million homes and 38,000 businesses are connected to the nationwide broadband network

76% of homes uses our fibre

Our partners are now able to deliver services up to 10 Gbps and more

information as at 31 March 2017

Smart Nation is an investment for our future. Together, we have been working hard to ensure that Singapore has the technology infrastructure that will inspire opportunities, sustainability and innovation for a better future.

At NetLink Trust, we connect government agencies, businesses and the public anywhere in Singapore to the nationwide fibre broadband network. This is the backbone for Singapore's Smart Nation, and the foundation for innovations in jobs, transport, healthcare, environment and services.

As at 31 March 2017, NetLink Trust has provided 49 NBAP connections to Aggregation Gateway Boxes (AG Boxes) under Phase 1 of the Smart Nation Platform. NetLink Trust is well-placed to support current and future Smart Nation programme initiatives.

## Our Role

Design, build and operate our fibre network infrastructure

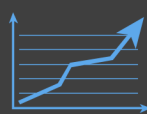

Work with partners to connect consumers and businesses to the nationwide fibre broadband network

Provide open and equal access to industry operators such as M1, Singtel, Starhub and more

## Our Goals

Improving service standards and building synergies

Strong partnerships to deliver fibre connectivity to all customers

Contribute to Singapore's vision of a Smart Nation

Leading telecommunications infrastructure provider in Singapore
